WELCOME THE LIGHT

INDOOR LIGHTING CATALOGUE | MADE IN ITALY

CHI SIAMO

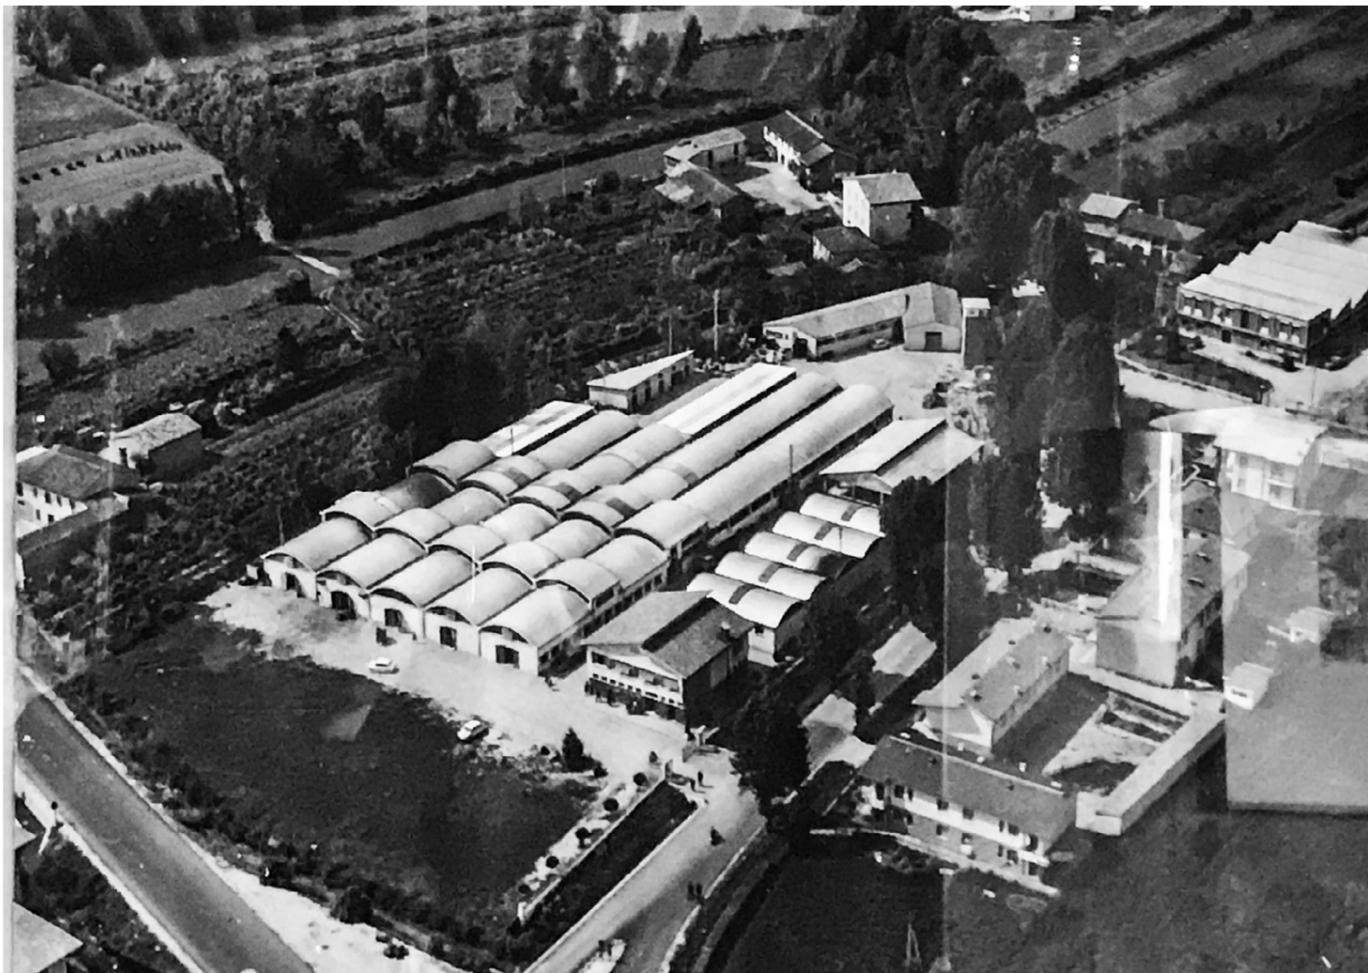

ABOUT US

WayPoint è una azienda dinamica, innovativa e attenta alla ricerca progettuale nel campo della luce.

WayPoint is a dynamic and innovative company, focusing on the research and development of new lighting projects.

È il 1963 quando Bruno Baesso comincia a produrre lampadari classici in ferro battuto nel sottoportico di casa. Per Alberto, figlio di Bruno, il laboratorio del padre è scuola e palestra: fin da piccolo impara a pensare e a creare come un vero artigiano della più ricca e fertile tradizione italiana. Nel 2000, assieme al figlio Philippe, fonda WayPoint, cercando di adattare alle esigenze della grande distribuzione una filosofia del prodotto e del processo che ricalca l'impostazione delle antiche botteghe. Nell'officina di WayPoint tutti sanno fare tutto. O quasi tutto. Ogni lavorazione, ogni macchinario può essere affidato a ognuno dei nostri artigiani operai, perché non esiste una figura specializzata in una singola mansione. Non è più la macchina che fa l'uomo, vincolandolo ai suoi ritmi e alle sue esigenze, ma l'uomo che fa la macchina. Nel 2010 da WayPoint nasce Lumicom, un brand volto alla creazione di articoli d'illuminazione di design rivolti al segmento della grande distribuzione, con un occhio puntato al futuro, oggi più che mai presente, la vendita online.

It was in 1963 when Bruno Baesso started manufacturing classic wrought-iron chandeliers in the portico of his house. For Alberto, son of Bruno, his father's laboratory was a playground and a gym: starting from an early age he learned how to think and create like a proper craftsman, one of the richest and most prolific Italian heritage. In 2000, together with his son Philippe, they founded Way Point, looking to adapt the needs of large distributors to a philosophy driven by product and design process that follows the footprints of ancient workshops. At Way Point's workshop everyone knows how to do everything. Or almost everything. Each production and each machine can be entrusted to each one of our craftsmen workers, because we don't have one person that only specializes in a single task. No longer is the machine that makes the man, who is tied to its rhythms and needs, but is the man who makes the machine. In 2010 from WayPoint born Lumicom, a lighting brand that talks mainly with the great distribution segment, with already an eye to the future, which is our present, the e-commerce.

MADE IN ITALY

CENTRO STILE

Stimolare idee, cogliere opportunità, coordinare i fermenti creativi. Il Centro Stile gioca questo ruolo dedicando intuizioni, creatività e progetti alla crescita dei brand Lumicom. Le forme dello stile decorativo-classico e contemporaneo vengono ripensate in base alle tendenze dell'arredamento e della moda, alle indicazioni suggerite dalla clientela e dal mercato, in una riflessione a tutto campo che spazia fra tradizione, rivisitazione, innovazione.

L'ONESTÀ DEL PRODOTTO

Onestà di prodotto significa ricerca: la collaborazione con i designer che trova il suo sbocco naturale nel design-in-progress di Lumicom in realtà influenza anche gli altri marchi, con un trasferimento fertile e continuo di nuove tecnologie, nuove fonti luminose, nuovi processi.

Onestà di prodotto significa qualità dei materiali. Vuol dire lavorare con pigmenti ad acqua, ad esempio, che sono atossici, anziché con i solventi; perché se anche il consumatore non nota la differenza, la differenza c'è per chi, in officina, questi pigmenti li deve applicare ogni giorno.

Onestà di prodotto significa artigianalità delle lavorazioni. Le logiche di prezzo sono uguali per tutti: ciò che costa di più ha richiesto tempi più lunghi di lavorazione, materiali più ricercati o tecnologie più all'avanguardia. È sempre il prodotto a dire l'ultima parola.

STYLE CENTER

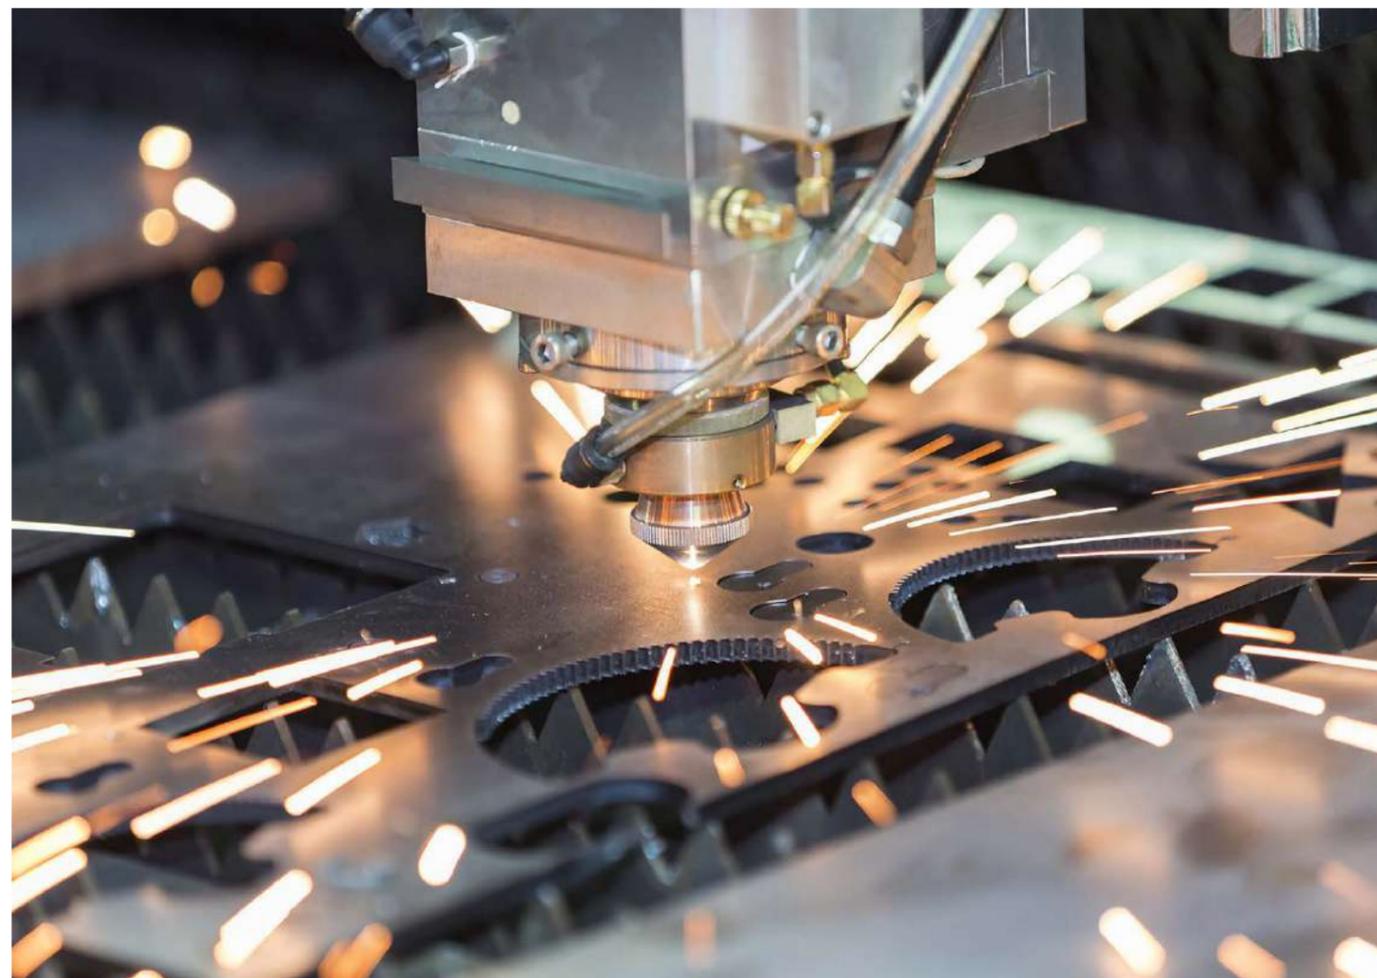

Stimulate ideas, seize opportunities, coordinate creative ferments. The Style Center plays this role by dedicating insights, creativity and projects to the growth of the Lumicom brands. The forms of the decorative-classic and contemporary style are rethought based on the trends in furniture and fashion, on the indications suggested by customers and the market, in an all-out reflection that ranges from tradition, reinterpretation, innovation.

L'ONESTÀ DEL PRODOTTO

Product honesty means research: the collaboration with designers that finds its natural outlet in Lumicom's design-in-progress actually also influences the other brands, with a fertile and continuous transfer of new technologies, new light sources, new processes.

Product honesty means quality of materials. It means working with water-based pigments, for example, which are non-toxic, rather than with solvents; because even if the consumer does not notice the difference, the difference is for those who, in the workshop, have to apply these pigments every day.

Product honesty means craftsmanship of the work. The price logic is the same for everyone: what costs more required longer processing times, more refined materials or more cutting-edge technologies. It is always the product that has the last word.

LA FILOSOFIA DELLE 4 "R"

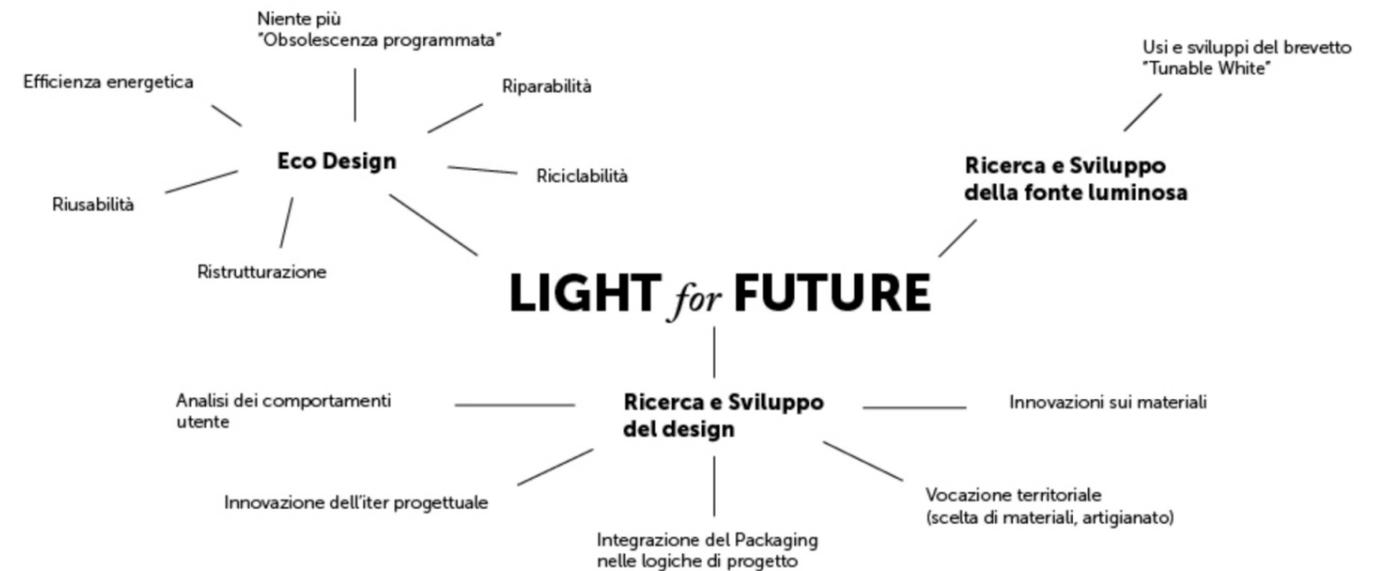

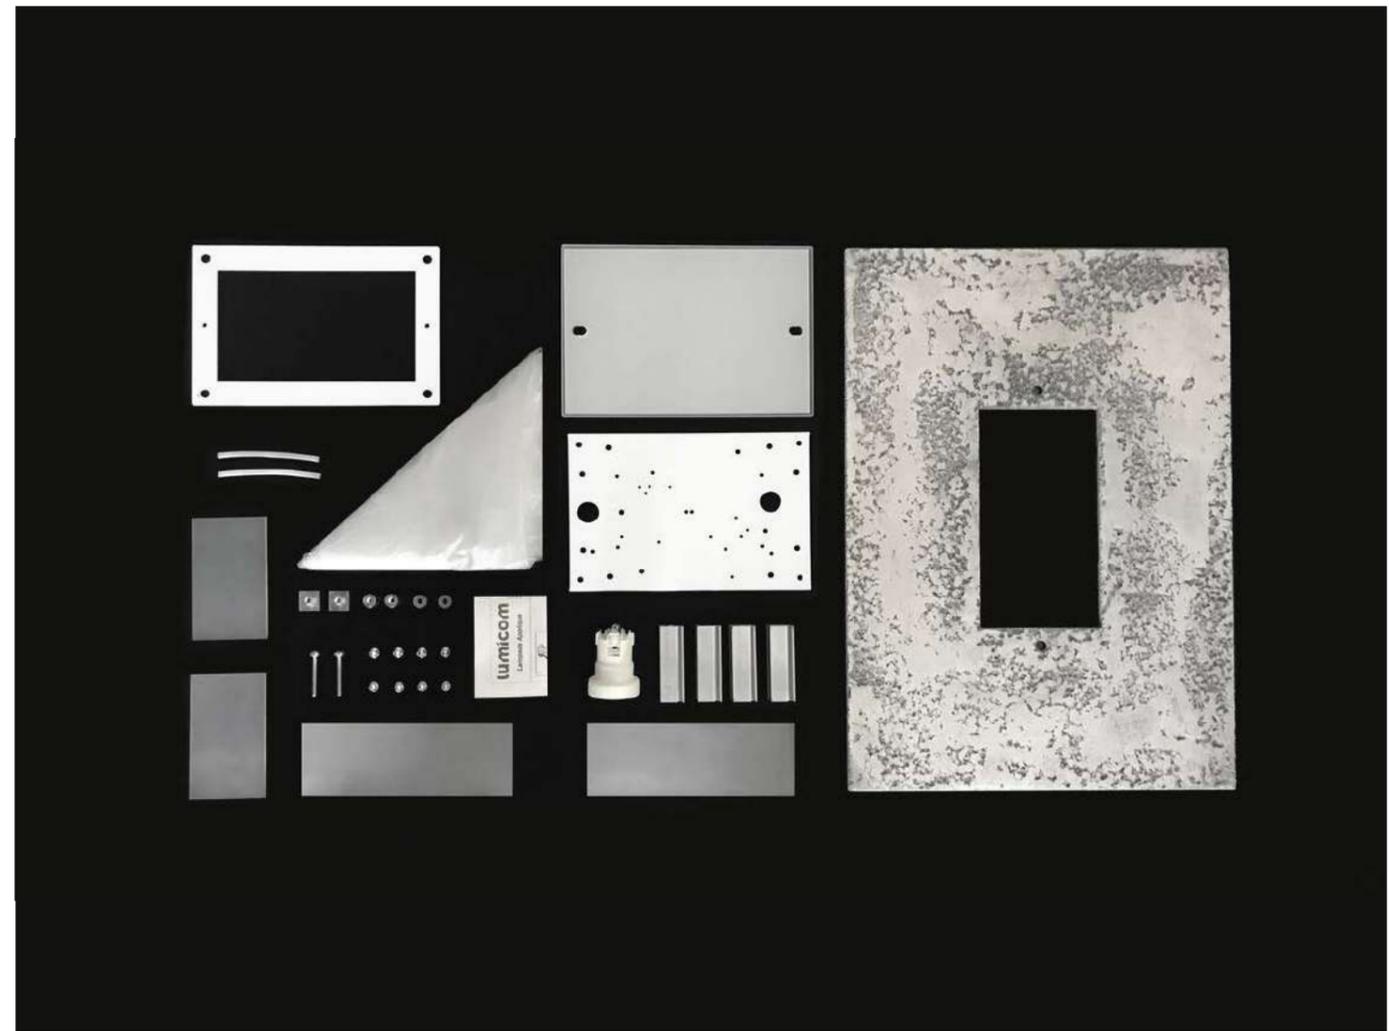

4 "R" PHILOSOPHY

Lumicom già da diversi anni ha intrapreso la strada dell'economia circolare, seguendo le linee guida della Ellen McArthur Foundation, con la realizzazione di prodotti che abbinano tradizioni artigiane, a design, Made in Italy, sviluppo e ricerca, proiettati ad un sempre maggiore efficientamento dell'articolo e al prolungamento del suo ciclo vita. Una filosofia etica nata in tempi non sospetti, non legata a strategie comunicative o di marketing. I nostri prodotti di illuminazione, infatti, già da tempo possono essere riparati, ricondizionati, rigenerati e riciclati già in linea con la normativa eco-design che entrerà in vigore da settembre 2021.

For several years Lumicom has already embarked on the path of the circular economy, following the guidelines of the Ellen McArthur Foundation, with the creation of products that combine artisan traditions, design, Made in Italy, development and research, projected towards ever greater efficiency of the article and the extension of its life cycle. An ethical philosophy born in unsuspecting times, not linked to communication or marketing strategies. Our lighting products, in fact, have been able to be repaired, reconditioned, regenerated and recycled for some time already in line with the eco-design legislation that will come into force from September 2021.

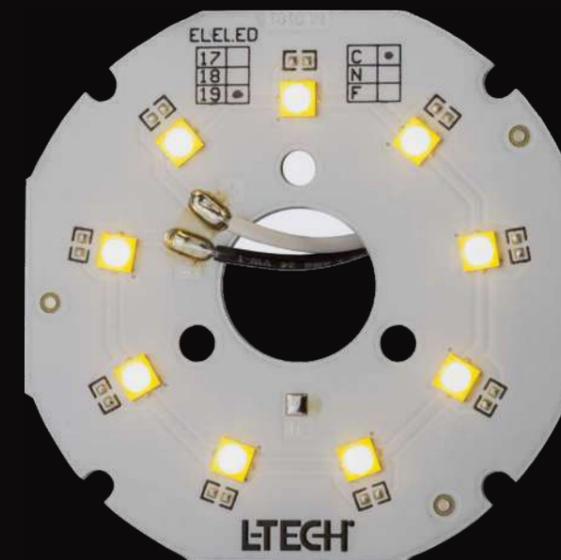

Il pianeta, ormai da anni, lancia il suo grido di allarme. L'economia lineare, quella attuale, non è più sostenibile ed ha dimostrato di essere un pericolo anche per la salute di tutti noi. La pandemia da Covid-19, ancora presente nelle nostre vite quotidiane, sta accelerando un processo di sensibilizzazione dell'opinione pubblica diventato ormai il punto centrale e di partenza di ogni decisione politica, presente e futura. Nella nostra azienda, da tempo, abbiamo sposato la filosofia delle 4R. Lavoriamo ogni giorno per far sì che ogni prodotto di illuminazione Lumicom, Waypoint e L-Tech possa essere Riparato, Ricondizionato, Rigenerato, Riciclato. Nulla, dalla nascita alla fine, perde valore, tutto può essere recuperato, tutto torna in funzione. Questa è l'economia circolare, questa è la nostra filosofia di produzione.

The planet, for years, has been raising its cry of alarm. The linear economy, the current one, is no longer sustainable and has proven to be a danger to the health of all of us as well. The Covid-19 pandemic, still present in our daily lives, is accelerating a process of public awareness that has now become the central and starting point of every political decision, present and future. In our company, for some time, we have embraced the philosophy of the 4Rs. We work every day to ensure that every Lumicom, Waypoint and L-Tech lighting product can be Repaired, Refurbished, Regenerated, Recycled. Nothing, from birth to the end, loses value, everything can be recovered, everything is back in operation. This is the circular economy, this is our production philosophy.

INDUSTRIA 4.0

INDUSTRY 4.0

TECNOLOGIE DELL'ANIMA

Soluzioni illuminotecniche sia funzionali che emozionali, per un perfetto equilibrio tra efficienza energetica e qualità della luce. Lavorare per la luce con professionalità e passione è la nostra missione! Seguire un progetto dall'idea all'industrializzazione, dalla scelta dei materiali a quella di tecnologie produttive affidabili per soddisfare le diverse esigenze progettuali e plasmare la luce secondo spazi, funzioni e target è il nostro impegno e la nostra dedizione.

TECHNOLOGIES AND SOUL

Both functional and emotional lighting solutions, for a perfect balance between energy efficiency and light quality. Working for light with professionalism and passion is our mission! Following a project from the idea to industrialization, from the choice of materials to reliable production technologies to meet the different design needs and shape the light according to spaces, functions and targets is our commitment and our dedication.

LUCE CHE DEFINISCE OGNI COSA

La luce non è un'entità vaga, imprecisa, indefinita. Al contrario la luce è qualcosa di concreto, determinato, continuo, certo. La luce è una materia misurabile e quantificabile, è una realtà che abbraccia spazio e architettura. La luce fa vivere le forme e i colori. Individua gli oggetti e i corpi creando relazioni tra loro. Colpisce la loro superficie, ne definisce sagoma e struttura creando contrasti di luce e ombra.

LIGHT THAT DEFINES EVERYTHING

Light is not a vague, imprecise, indefinite entity. On the contrary, light is something concrete, determined, continuous, certain. Light is a measurable and quantifiable matter, it is a reality that embraces space and architecture. Light brings shapes and colors to life. Identify objects and bodies by creating relationships between them. It affects their surface, defines their shape and structure, creating contrasts of light and shadow.

SOSTENIBILITÀ

IL NOSTRO APPROCCIO

Ogni giorno ci impegniamo a migliorare le nostre prestazioni in termini di sostenibilità ambientale e sociale. Il nostro approccio è graduale e ci permette di sfruttare le nostre competenze artigianali per la riduzione degli sprechi e l'implementazione di pratiche di riciclaggio per ridurre l'impatto ambientale delle nostre attività.

Il nostro impegno verso la sostenibilità ambientale e sociale si basa su un obiettivo: avvicinarci sempre di più ai nostri stakeholder. Il Report di Sostenibilità 2023 rappresenta per noi l'opportunità di promuovere trasparenza e condividere i nostri progressi con voi.

OUR APPROACH

Every day we are committed to improving our performance in terms of environmental and social sustainability. Our approach is gradual and allows us to leverage our artisan skills to reduce waste and implement recycling practices to reduce the environmental impact of our activities.

Our commitment to environmental and social sustainability is based on one objective: to get ever closer to our stakeholders. The 2023 Sustainability Report represents an opportunity for us to promote transparency and share our progress with you.

IL NOSTRO PERCORSO

Al centro della nostra strategia di sostenibilità ci sono tre aree di intervento.

OUR PATH

At the heart of our sustainability strategy are three areas of intervention.

Declaration of conformity to all safety requirements laid down by EU directives and regulations.

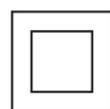

Classe 1/ messa a terra

Il prodotto è predisposto per avere un collegamento con messa a terra.

Class 1/ grounding

The product is designed to have an earthed connection.

Classe 2/ doppio isolamento

Il prodotto è predisposto per avere un cablaggio bipolare con doppio isolamento.

Class 2/ double insulation

The product is designed to have bipolar wiring with double insulation.

IP 20

Grado di protezione IP

Grado di protezione contro il contatto di corpi solidi esterni e contro la penetrazione di liquidi.

IP Protection Rate

Protection index against contact with external solid bodies, against access within the body of the entire unit and against the penetration of liquids.

IP 00

Resistenza alla penetrazione di corpi solidi

Resistance to the penetration of solid objects.

Resistenza alla penetrazione di liquidi.

Resistance to the penetration of liquids.

0	Nessuna protezione. No protection.	0	Nessuna protezione. No protection.
1	Protezione contro i corpi solidi di dimensioni superiori ai 50mm. Protection against solid objects greater than 50mm.	1	Protezione contro il gocciolamento. Drip-proof
2	Protezione contro i corpi solidi di dimensioni superiori ai 12mm. Protection against solid objects greater than 12mm.	2	Protezione contro le cadute di gocce d'acqua fino a 15° dalla verticale. Protection against waterdrops falling with an angle up to 15° from the vertical line.
3	Protezione contro i corpi solidi di dimensioni superiori ai 2,5mm. Protection against solid objects greater than 2,5mm.	3	Protezione contro la pioggia. Rain-proof.
4	Protezione contro i corpi solidi di dimensioni superiori ai 1mm. Protection against solid objects greater than 1mm.	4	Protezione contro gli spruzzi. Splash-proof.
5	Protetto contro la polvere. Dust-proof.	5	Protezione contro i getti d'acqua. Jet-proof.
6	Totalmente protetto contro la polvere. Dust-tight.	6	Protezione contro i getti d'acqua in pressione. High pressure water jet protection.
		7	Stagno all'immersione. Watertight (immersible).
		8	Stagno alla sommersione. Pressure-watertight (submersible).
